

OctoAssist

User Guide

How to use the OctoAssist ITSM platform

Production environment

<https://octoassist.thirdoctopus.com>

Third Octopus · May 2026 · Version 1.0

Five things you will learn how to do

- 1 Sign in**

How to access OctoAssist with Microsoft Entra ID single sign-on or a local password.
- 2 Raise a ticket**

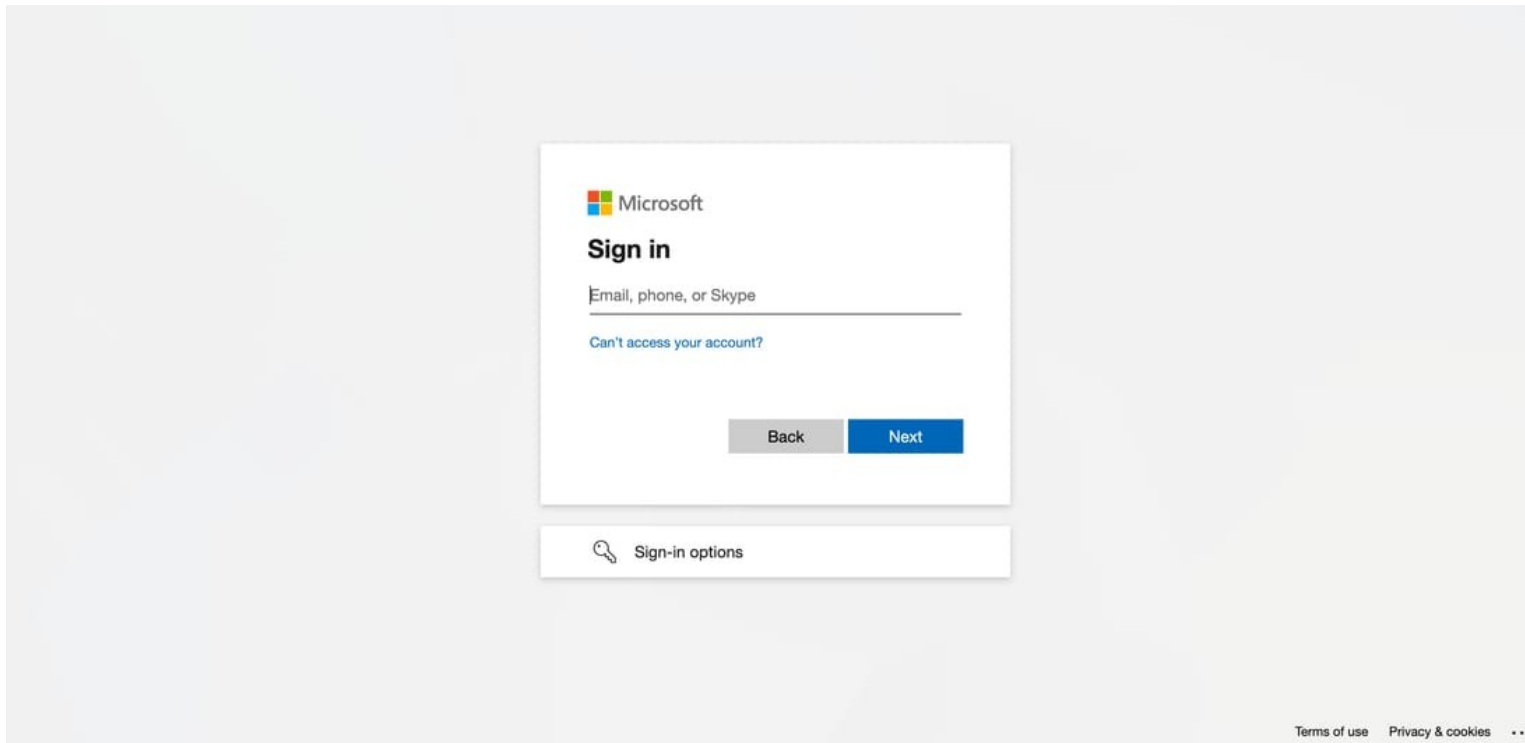

Two paths — the agent ticket form for technicians, the requester portal for everyone else.
- 3 Work a ticket end-to-end**

Triage, assign, comment, resolve, close — with the right keyboard shortcuts.
- 4 Use the everyday IT pages**

Changes · Problems · Patches · Assets · Software · Knowledge Base · Reports.
- 5 Configure your settings**

Where admins set SLAs, holidays, the CAB, the software catalog and email.

Open the sign-in page and choose how to authenticate

Two ways to sign in

Microsoft Entra ID (SSO)

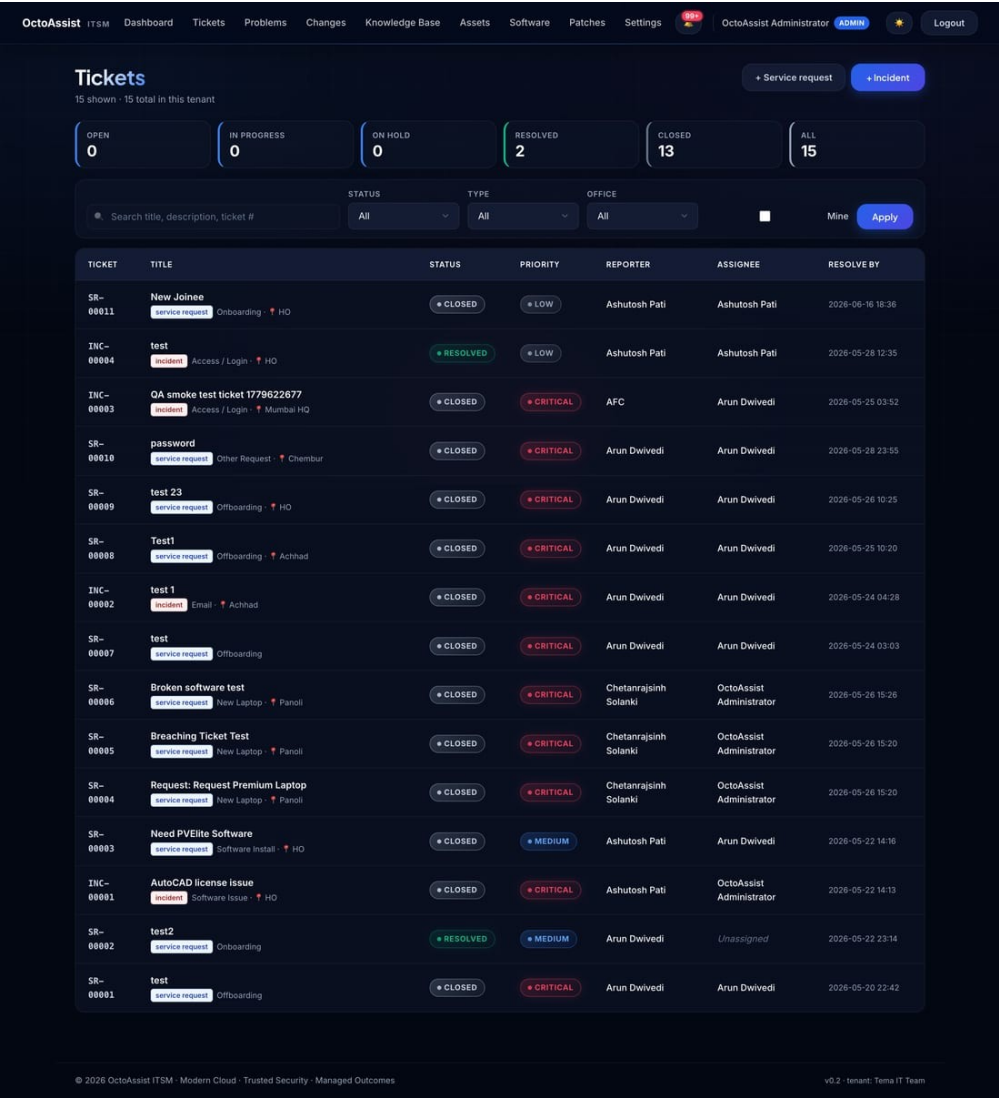

Click 'Sign in with Microsoft Entra ID'. Use your work email. Recommended for everyone.

Local password

Enter the email + password supplied by your administrator. Falls back when SSO is unavailable.

The Tickets page — everything you need on one screen

What each column shows

- Ticket** Auto-generated number — INC-xxx or SR-xxx
- Title** What the requester typed plus a category pill
- Status** Open · In Progress · On Hold · Resolved · Closed
- Priority** Low · Medium · High · Critical (colour-coded)
- Reporter** Who raised it
- Assignee** Who is working on it (or Unassigned)
- Resolve by** Auto-calculated from the SLA matrix

Submit a new ticket — agent form

© 2026 OctoAssist ITSM · Modern Cloud · Trusted Security · Managed Outcomes

v0.2 · tenant: Tema IT Team

What to fill in

- 1

Title

One-line summary of the issue (under 80 characters).
- 2

Category

Pick the closest match — this drives the SLA.
- 3

Priority

Low / Medium / High / Critical based on impact.
- 4

Reporter

Pick from the directory if you are filing on behalf of a user.
- 5

Location

Mumbai HQ / Chembur / Vadodara / etc. — drives location routing.
- 6

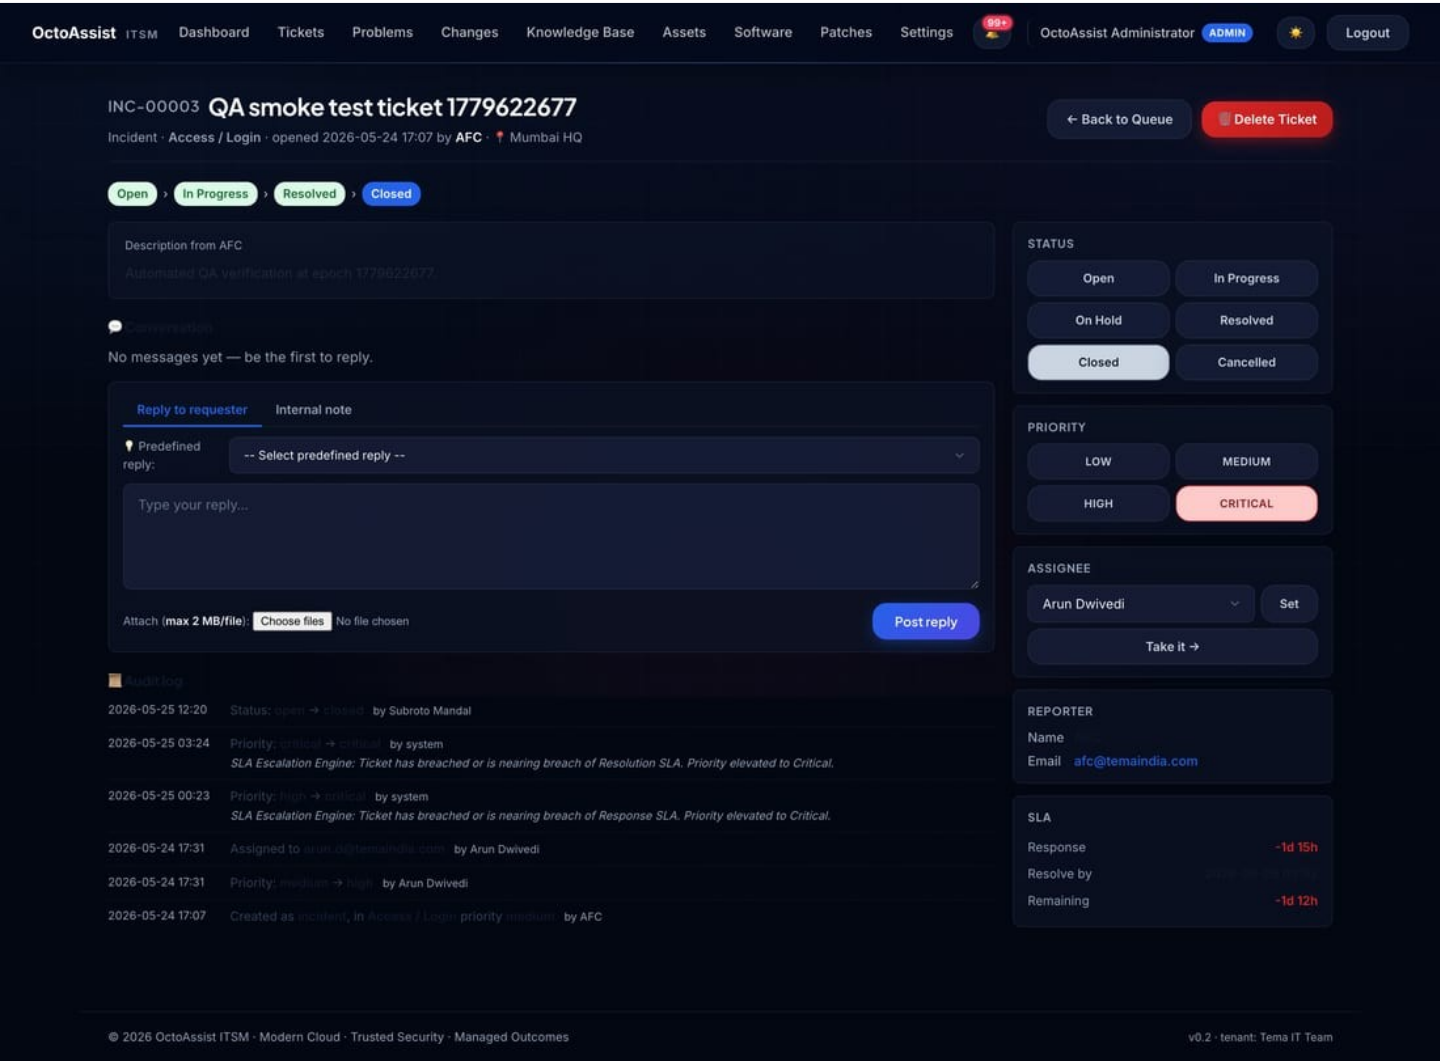

Description

What's happening, what was expected, what error message appeared.
- 7

Submit

Reporter, assignee and CAB members are emailed instantly.

Triage → comment → resolve, all on one page

Five things you can do here

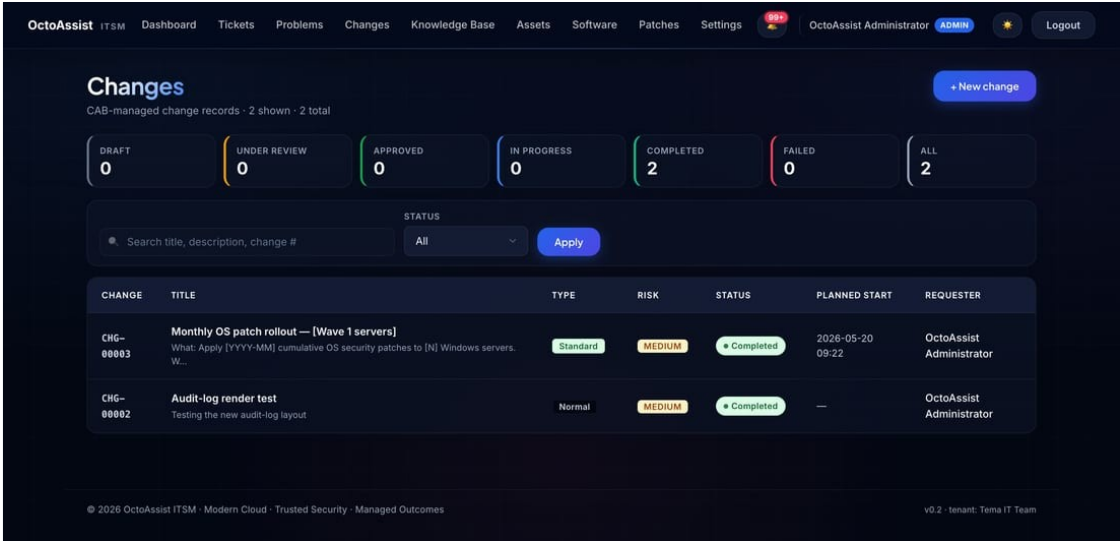

- 1 Change status**
Open → In Progress → On Hold → Resolved → Closed.
- 2 Change priority**
Raise or lower if impact changes.
- 3 Reassign**
Pick another technician; both parties get email.
- 4 Add a comment**
Public (emailed to requester) or Internal note.
- 5 Insert a reply**
Pick from predefined templates dropdown.

Who gets emailed and when

Every state change fires an email via Microsoft Graph. You don't need to do anything — it's automatic.

Event	Recipients	Email subject
Ticket created	Reporter + assignee (if set) + every CAB member	[OctoAssist] T-xxxx — created
Ticket assigned	Reporter + new assignee	[OctoAssist] T-xxxx — Assigned to Technician
Status changed	Reporter	[OctoAssist] T-xxxx — Status Updated to ...
Priority changed	Reporter	[OctoAssist] T-xxxx — Priority Updated to ...
Public comment	Reporter and assignee (not the author)	[OctoAssist] T-xxxx — New comment posted

Submit a change for CAB review

The seven-state change lifecycle

✓ Submit

Fill title, type (Standard / Normal / Emergency), risk, target date, plan + rollback. Click Submit.

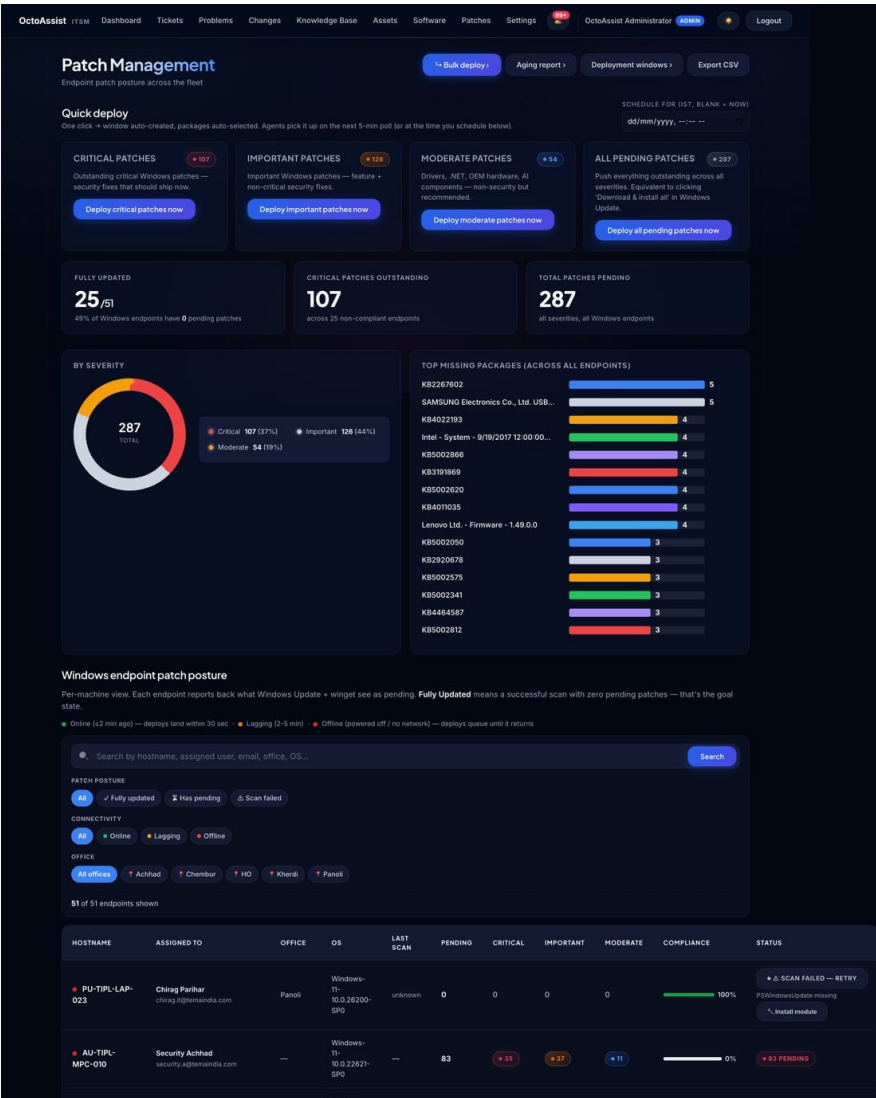

📝 CAB review

Every CAB member receives an email with one-click Approve / Reject. Quorum enforced before Approved.

📅 Schedule + execute

Pick a window, mark In Progress at the start, mark Completed at the end. Activity log preserves every step.

See patch posture, schedule patch windows

What this page shows

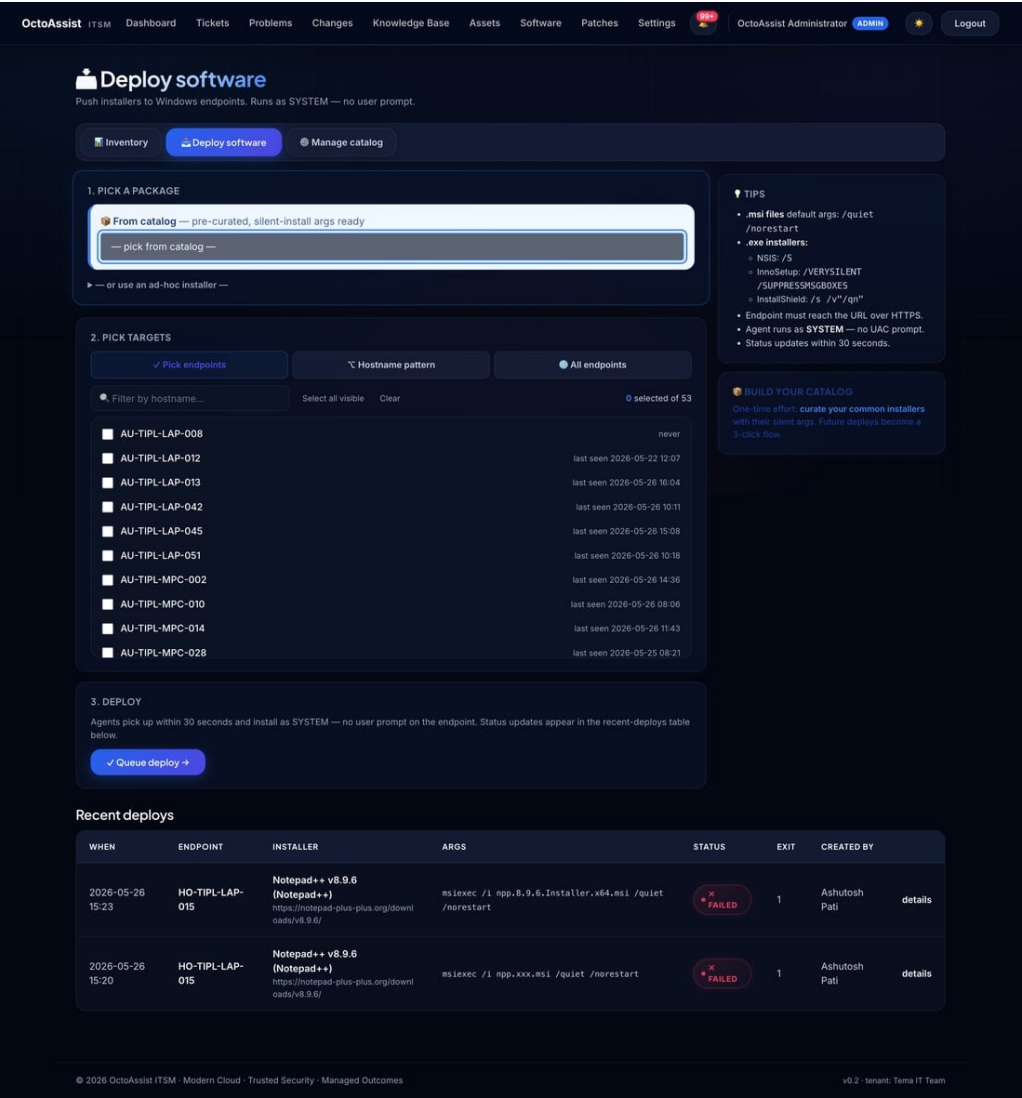

- Hostname + assigned-to user + office
- Online status (last 5 min check-in)
- Critical-pending patch count
- Important-pending patch count
- Last successful install date

To schedule a patch window

Patches → Patch windows → New

Pick start time + targets (endpoints or Asset Group) + auto-execute mode. Save.

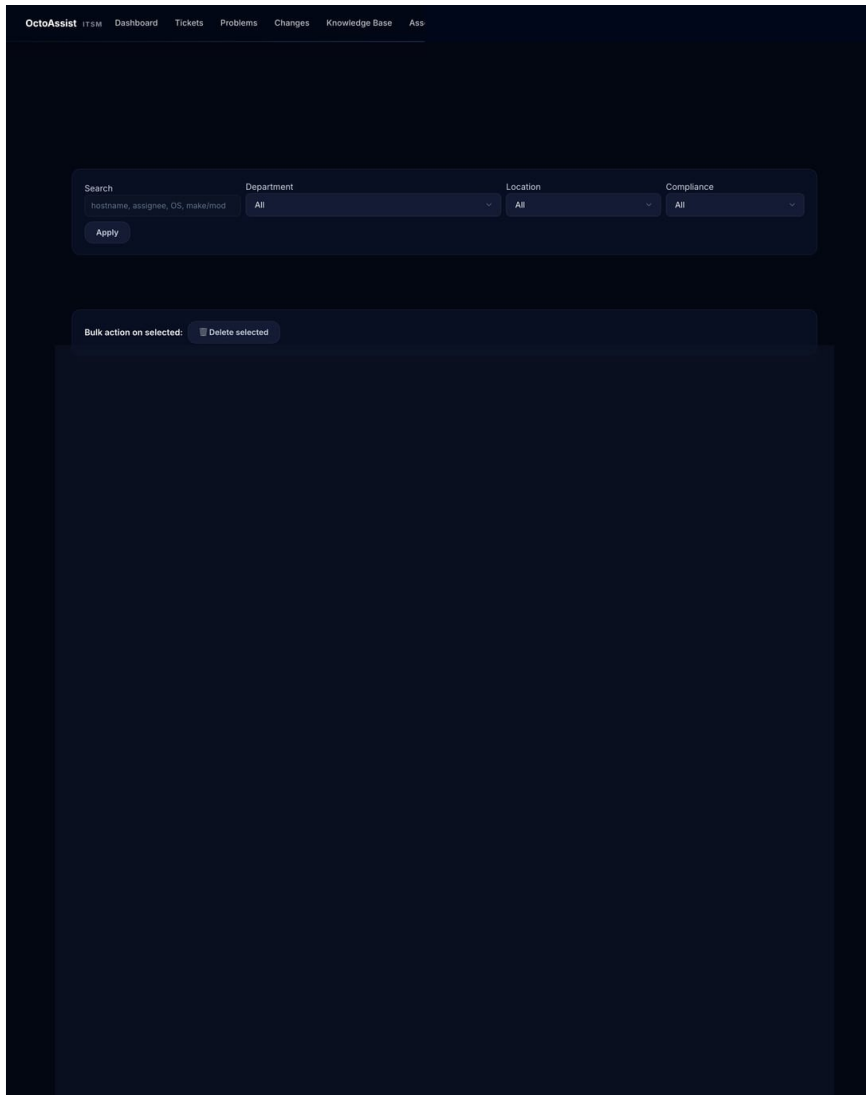

Catalog-driven, multi-select, one-click queue

How to deploy software

- Pick a package**
From the catalog dropdown — Chrome, Acrobat, your LOB app, etc.
- Pick targets**
Multi-select endpoints, OR pick an Asset Group.
- Queue deploy**
Job runs at each endpoint's next 30-second check-in.
- Track status**
Live status flips: pending → in_progress → succeeded / failed.

Every Windows endpoint, reported by the agent

Click any hostname to drill in

- Hardware spec (CPU, RAM, disk)
- OS + build + last reboot
- Installed software inventory
- Windows Services panel
- Patch posture + history
- Remote actions queue + log
- All tickets this user raised

HOW THIS WORKS

CAB (Change Advisory Board) members are the people who review and approve production changes. Once a user is in the CAB:

- They get emailed on every new **change** submitted (review + approve at /changes).
- They get FYI emails on every new **incident / service request** created — so leadership sees what's hitting the helpdesk.

Users in this list come from your Entra ID directory sync (or were created locally). Toggle the checkbox to add or remove.

[← All settings](#) · 2 packages curated

HOW THIS WORKS

Curate the installers your team deploys regularly — Chrome, Acrobat Reader, the VPN client, internal LOB apps — once, with their silent-install args and (optionally) an uninstall command. They then appear in the [Deploy software](#) dropdown so the helpdesk picks a package + endpoints + clicks **Queue deploy**. No more pasting URLs and remembering vendor-specific silent flags every time.

Installer URL can be a public vendor link, an Azure Blob / SharePoint share, a corporate file server (must be HTTPS-reachable from the endpoint), or use the OctoAssist upload pipeline to host it.

Skip business holidays in SLA math

OctoAssistITSMDashboardTicketsProblemsChangesKnowledge BaseAssetsSoftwarePatchesSettingsAdminLogout

Holidays & SLA Calendar

← All settings · 15 holidays configured

BUSINESS CALENDAR SLA RULES

When SLA response and resolution targets are calculated for new tickets:

- **Weekends** (Saturdays & Sundays) are automatically paused and skipped.
- **Holidays** listed below are automatically paused and skipped based on local dates.
- **SLA Pausing:** When a technician moves a ticket status to "On Hold", the SLA clock is paused immediately. When shifted back, the due date is automatically extended by the paused duration.

ADD HOLIDAY

Holiday Date

dd/mm/yyyy
